

Matière lumière

PARIS

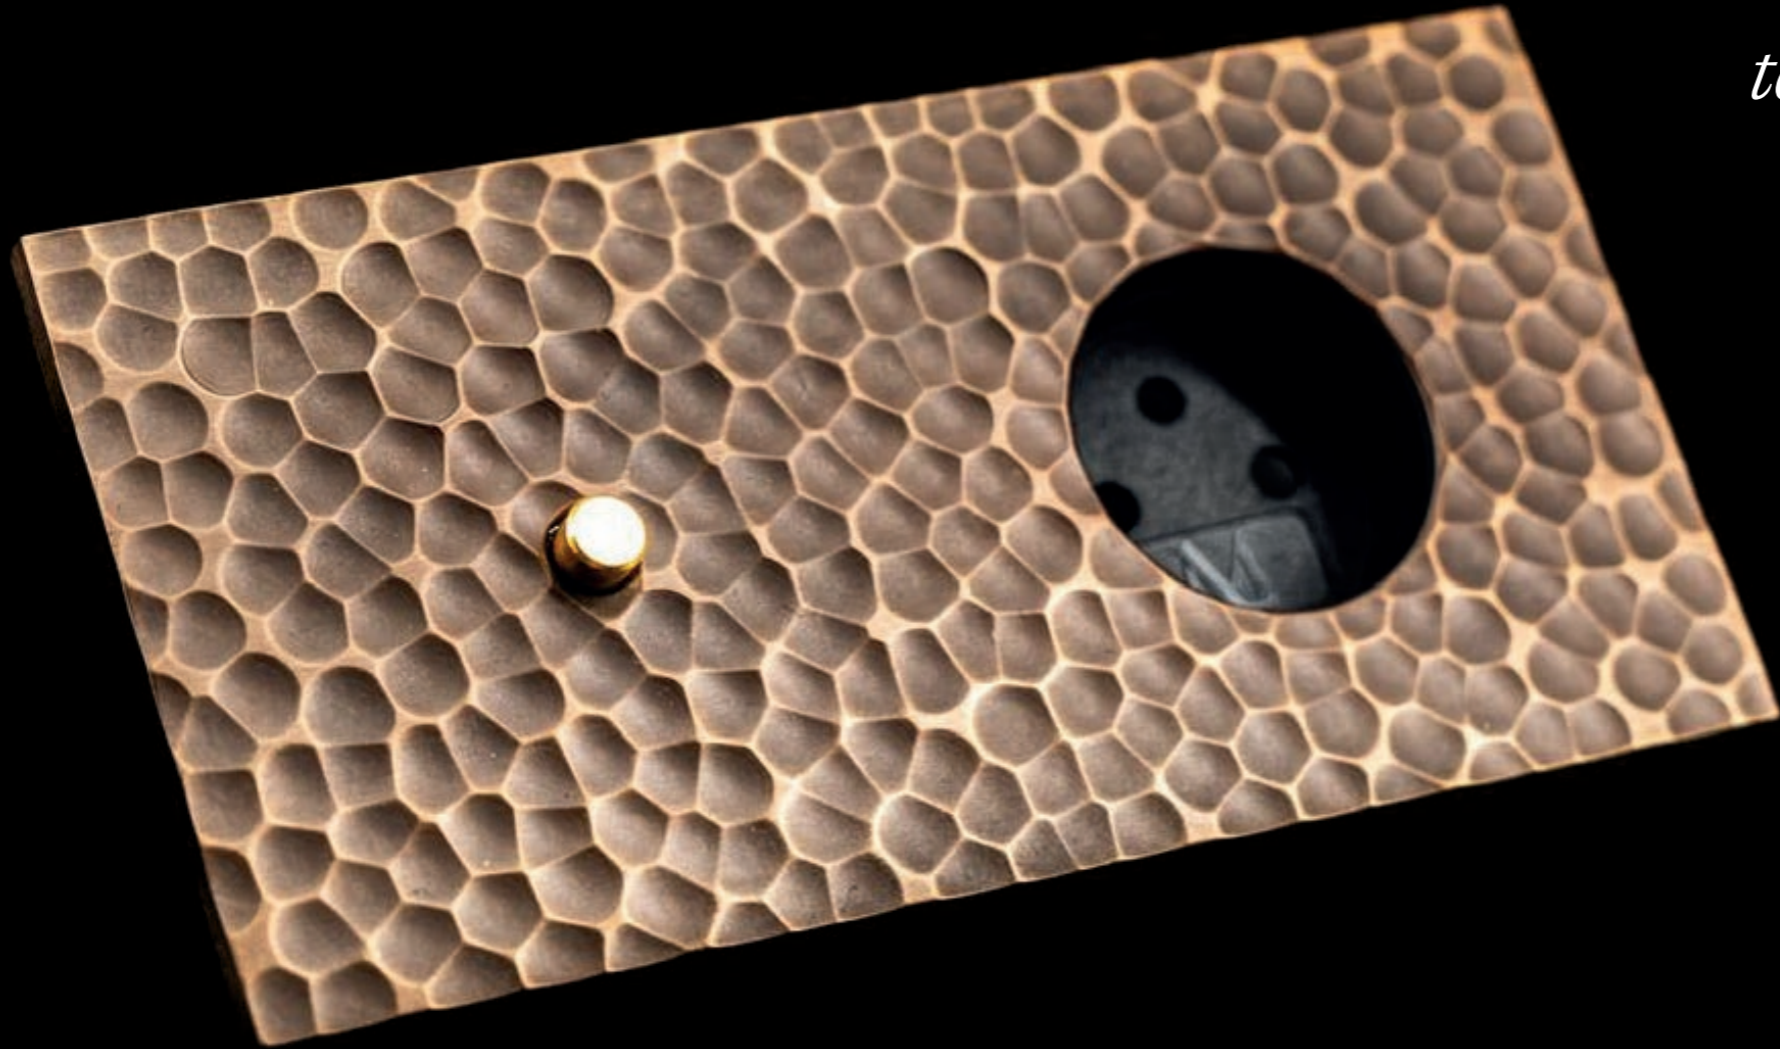

Expertise in *technology, design,* and materials

Matière Lumière offers the best in luxury switches and electrical outlets. The use of raw and machined materials such as brass and aluminum, presented in original designs crafted through the combination of our creativity and expertise, enhances your interiors with attention to detail.

From luxury hotel rooms to high-end residences, our collections of luxury switches and electrical outlets, Original or Métamorphose, will meet your highest expectations.

Our collections
of electrical equipment
tell a story

ORIGINEL

Aluminum for designer switches and unique electrical outlets!

- The mechanism, including buttons, outlets, and other components, is directly integrated into the aluminum finish plate.
- The box is fixed using visible Torx screws, matched to the color of the plate for perfect harmony.
- With a thickness of only 3 mm, the Originel collection is the thinnest of our collections.

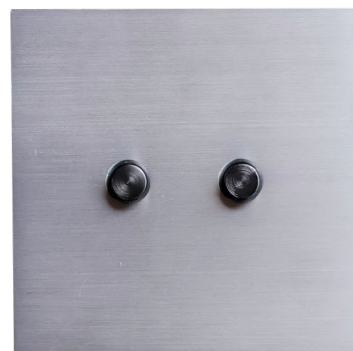

MÉTAMORPHOSE

Brass to make light shine

- The Métamorphose collection is exclusively made of brass. It consists of a finish plate 85 mm wide, along with a mechanism incorporating various electrical components.
- The box is fixed using screws hidden under the finish plate, providing a clean and elegant look. This allows for tilt adjustment and ensures coverage of the recessed box.
- The finish plate, with a thickness of 5 mm and rounded edges, visually refines the profile of the plate.
- This plate is magnetized, making installation easier.
- Finishing collars around the buttons are available in all our finishes.

A collection inspired by the ocean **ARMEN**

- The Armen collection consists of a mechanism incorporating various electrical components along with a finish plate made of aluminum or brass.
- The box is fixed using screws hidden under the finish plate, providing a clean and elegant look. The Armen collection allows for tilt adjustment and ensures coverage of the recessed box.
- The finish plate has a thickness of 5 mm.

A *tailor-made service* for your most ambitious projects

Every project deserves a dedicated approach. Matière Lumière puts its expertise at the service of ambitious projects, offering personalized support and solutions tailored to each architectural context.

FORMATS

Here are the different formats we offer:

FINISHES

Customize with precision

Surface-mounted *installations*

Surface-mounted installation becomes an architectural choice in itself. Boxes and tubes are designed to extend the design of the equipment, creating a coherent and controlled visual continuity.

An approach where technique is no longer hidden but expressed through material, proportions, and detail.

Floor *outlets*

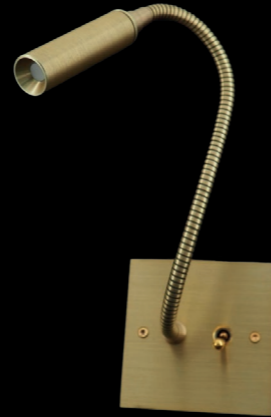

Crafted to meet the needs of residential and commercial projects, our floor outlets are designed to integrate harmoniously into your spaces. A clever blend of finesse and robustness. Depending on your needs, they are available in single, double, triple, or quadruple formats.

Precise and fully adjustable lighting

KORZEN *Flexible*

- Korzen on flexible is a cylindrical reading light offering precise and directional lighting.
- Its flexible arm allows the light to be oriented as needed, ensuring optimal comfort for reading or accent lighting.
- Discreet and elegant, it integrates harmoniously into all spaces, combining functionality and aesthetics.

TRACTION

The Power of Light

- Inspired by the headlight of the legendary Traction Avant, the Traction reading light offers soft and adjustable lighting, ideal for nighttime reading.
- Compact and elegant, it fits perfectly next to your bed, providing clear and comfortable light for a pleasant reading experience without disturbing your sleep.

KORZEN *Rotule*

Adjustable lighting with pivoting articulation

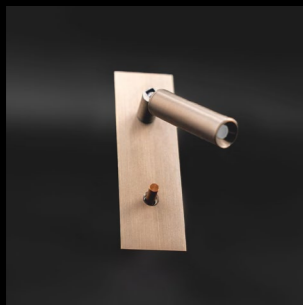

- Korzen on rotule is a cylindrical reading light equipped with a pivoting articulation, offering precise and adjustable lighting.
- Thanks to its rotule, it allows smooth orientation and optimal positioning as needed.
- Its sleek design and refined construction make it an elegant choice, ideal for functional use while harmonizing with any interior.

INFORMATIONS

- Flexible: 25 cm, designed for optimal light orientation.
- Lighting temperature: 3000K, offering soft and warm light.
- Diffuser: Champagne finish, enhancing warmth and visual comfort.
- Fixation: Visible screw system, ensuring robust and durable installation.
- Integration: Compatible with all our plate compositions, adapting to various arrangements. Example: 2 power outlets / 1 two-way switch / 1 reading light (80x240 mm).
- Power supply: 230V, without intensity variation capability.

FINISHES

Customize with precision
